

# EMAIL SECURITY

What is it and why is it important?

Equity Title of Washington has implemented sophisticated email security measures for your protection. We utilize software that protects millions of users worldwide against targeted attacks, data leaks, malware and spam.

If you are an Equity Title customer, you may have noticed that our emails containing non-public personal information (NPI) are encrypted. We know that there are a few extra steps needed to extract these emails securely, however, the consequences of *not* taking those extra steps can be devastating to our clients and customers. It truly is worth it!

## Cyber Attacks Are On The Rise

There are 3 Million to 14 Million attempted Cyber attacks per day worldwide.

## We Stop Attacks Before They Happen

Our sophisticated email software successfully identifies and filters hundreds of thousands of phishing, spam, and potentially harmful email attempts per day.

In the scope of our daily business practices, Equity Title of Washington handles sensitive and personal information. We take our role in securing that information very seriously. We are proud that our customers and clients can trust our business practices. From our President to our Receptionist, we understand the importance of your trust in us.

Please contact us with any questions you may have about Email Security. We are happy to work with you to ensure that your transactions are safe and secure.
